Y2K STATEMENT FOR LORAN-C AND GPS/DGPS

The last expected Y2K transition that may cause problems is the Leap Year rollover, 28-29 February 2000. The Coast Guard expects LORAN and DGPS to function properly through this final transition. However, individual units may fail or experience problems. In addition, ancillary and support systems that the Coast Guard has no control over, such as commercial power and voice/data networks, may impact or interrupt service. There is also potential for the problem to extend to other electronic receivers and applications such as electronic charting systems. Users are urged to contact manufacturers to ensure their equipment will function through this transition period. Users should also develop contingency plans for possible equipment or system failures on these dates. Questions or comments should be referred to the Coast Guard Navigation Center (NAVCEN) at (703) 313-5900. Additional information can also be found at the NAVCEN web site at <http://www.navcen.uscg.mil>

IV. CHART CORRECTIONS (C)

Corrective action affecting charts is contained in this section. Chart Corrections are listed numerically by chart number beginning with the lowest and progressing through all charts affected. The correction listed pertains to that chart only. *It is up to the mariner to decide which charts are to be corrected.* The following example explains the individual elements of a typical correction.

Chart Number	Chart Edition	Edition Date	Last LNM	Datum	Source Agency	Current LNM
Corrective Action	Object of Corrective Action					Position

The letter (M) immediately following the chart number indicates that the correction should be applied to the metric side of the chart only. A chart number preceded by an asterisk (*) indicates that the chart is the largest scale chart that the correction appears on. When (temp) appears below the chart number the chart correction is temporary in nature. The letter (N) preceding the current Notice to Mariners number indicates a Distribution Limited (not for sale) chart or publication. It is usually for U.S. Navy, government owned or chartered ships only. Courses and bearings are given in degrees clockwise from 000° T. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles.
